

## NEW...ECO-FRIENDLY ENTRANCE MATS!!!

### **Green Buildings/Recycled Matting**

- New Eco Plus and Eco-Step 100% recycled surface
- Made from post-consumer products
- Helps preserve the environment with recycled tires & bottles
- Buildings are cleaner and greener
- EcoPlus backing is made with 15% post-consumer recycled tires.
- Eco-Step vinyl backing is made with natural organic resin blend which helps preserve our natural resources.

#### Help Us Preserve the Environment!

ECOPLUS and ECO-STEP surfaces are made from 100% recycled post-consumer products. This means less bottles and tires will enter landfills.

1 sq. ft	=	4 bottles
4' x 6' mat	=	96 bottles
6' x 60' roll	=	1,440 bottles

### **Stay 80% Cleaner with the Right Entrance Mats Combining 15' of Scraping and Wiping Mats**

- Captures, holds and hides dirt
- Reduces dirt, moisture and grime tracked in by up to 80%,
- Drastically lowers maintenance costs
- Improves air quality, protects floors and prevents slips and falls

### **Attack Fatigue at its Source**

A tired worker is less safe and less productive. Long hours of standing are the problem. 83% of industrial workers report pain and fatigue from standing. The good news is that corrective matting attacks the problem at its source.

- Change the chemistry of the lower body
- Reduces lactic acid build-up by keeping muscles active
- Alleviates fatigue, pain and distraction
- Fewer workers' comp claims
- Better morale
- Improved productivity

### **Slips & Falls can be Prevented**

Slips and falls are the #1 cause of workplace injury. Crown mats improve safety, visual awareness and lower liability exposure, while preventing costly injuries with these features:

- bright colors
- slip-resistant surfaces
- beveled edges

### **Specialty Mats Meet Special Needs**

Specialty matting simultaneously delivers anti-fatigue and safety benefits, from controlling static to giving workers a grip on slanted shipping docks to Protecting carpet under the office desk.
