Protecting the Environment: One Step at a Time

The EcoPlus™ entry matting systems from Crown Mats and Matting are a totally new generation of mats made from recycled, postconsumer materials such as plastic bottles molded to a reinforced, rubber/nitrate backing.

These mats not only help protect natural resources, they provide excellent performance and are designed for use in heavy traffic areas such as office buildings, hotels, and malls.

The EcoPlus systems have nonskid backings; crush-resistant, reinforced patterns for aggressive scraping action; and raised edging to retain soil and moisture.

For more information, visit www.crown-mats.com or call toll-free: 800-628-5463.

About Crown Mats and Matting

For more than 60 years, Crown Mats and Matting has been a pioneer in the development and manufacture of matting products. Beginning with the invention of walk-off matting by the company's founder, R.P. Johnson, the company now has the most diverse matting product line offered in our industry. Crown sells matting through an extensive network of highly trained sales representatives throughout the United States and worldwide. These sales experts are familiar with the features and benefits of all matting systems and are able to help their clients find the right system for virtually any application.
