Matting to Protect Indoor Air Quality

Crown Mats' Dust-Star™ Microfiber Wiper Mat is the most effective wiper mat on the market helping to improve indoor air quality and the cleanliness of scores of buildings such as schools, offices, factories, restaurants, and healthcare facilities.

The Dust-Star features a unique microfiber/olefin blend with positively charged microfibers that attract and hold hair, lint, dust, and other pollutants, preventing them from becoming airborne.

And it also traps wet contaminants, holding close to three times more liquid than a standard olefin wiper mat.

About Crown Mats and Matting

For more than 60 years, Crown Mats and Matting has been a pioneer in the development and manufacture of matting products. Beginning with the invention of walk-off matting by the company's founder, R.P. Johnson, the company now has the most diverse matting product line offered in our industry. Crown sells matting through an extensive network of highly trained sales representatives throughout the United States and worldwide. These sales experts are familiar with the features and benefits of all matting systems and are able to help their clients find the right system for virtually any application.
