

How to Apply Nosing To Mats

In order to ensure your nosing dries evenly, you will need a weight to weigh down the freshly glued edges.

1. Measure a piece of nosing to fit the end of the mat. Make sure to cut the nosing at least one inch longer than the mat. This will be trimmed to size later.
2. Apply a line of glue close to the raised lip of the nosing. Apply a second line of glue as shown on video.
3. Press nosing into place against the mat and apply weight to the freshly glued edge.
4. Allow glue to dry – see the instructions on glue bottle for drying time.
5. Trim excess nosing flush to mat.
